If you’re still unsure, Xero users can contact our support team 24/7 for help.How do I set up an accounting system for a small business?There are three basic steps to setting up an accounting system. The aim is to keep everything simple and accurate. First, open a dedicated business account for all your incoming and outgoing payments. Second, decide which accounting method (cash or accrual) suits your business. Third, choose accounting software, such as Xero, that has the features you need, like the ability to use eInvoicing and send foreign currency payments.There are three basic steps to setting up an accounting system. Second, decide which accounting method (cash or accrual) suits your business. Third, choose accounting software, such as Xero, that has the features you need, like the ability to use eInvoicing and send foreign currency payments.Can I use Excel for bookkeeping?Technically, yes. But it can be a time-consuming process to work across different data sources and tools. Accounting software like Xero does this work for you. Xero keeps all information in one secure place, and makes automatic calculations to keep your records accurate and up to date. Because Xero is based in the cloud, you can log in at any time, from anywhere, and give your accountant and bookkeeper access so you can easily work with them on your finances.Technically, yes.
