A letter, etc. iPhone allows you to create all the contacts you need, so you will always have important contact details. If someone has contributed to installing your iPhone, it may have imported old telephone contacts on your iPhone. If you purchased your iPhone Online, you can visit your wireless service provider and ask someone to move your contacts. To activate the recipient: the iPhone provides many ways to save contact information from the phone gadget: click on contact, then click the + button in the upper right corner. Click the "CNC", then press the "Information" button next to the desired number. Here you can create a new contact or add a number to existing contact. Press the keyboard, enter the phone number, then click "Add the number". Include contact details during the creation of a contact (at least) enter your name and your phone number. However, you can also enter other information such as E-Mail. E-mail address, rue and date of birth. You can add the contact details for the first time by connecting the contact and open the contact and item existing for publication.

Change the contact details, if necessary.

After the end, click on "Ready". Show addresses, if different people are on your contact list, they can be difficult to quickly find the recipient. Fortunately, there are two simple visual contact methods: search: you can quickly search for all your contacts using the research line at the top of the contact list. Just click on the search bar and insert. All contacts that correspond to your research. Just click on the desired letter to the right of the contact list. You can also slide your finger upwards or down to the field to slide quickly along the contacts. To install the "My Information" tab: if you want Siri to buy your personal contact data, you will have to install my information sheet. This will allow Siri to respondComplex requests such as giving me directions at home or reminding me of my meeting when I come to work. You will have to create contact with your name and information before you can identify my information sheet. Click the "Settings" icon in the main screen. Find and choose your name. The information sheet will be identified with your data. To add relationship labels: if you want Siri to understand your relationship with different contacts (for example, Frank is your brother and Susan is your mother), you can add relationship labels. To add a relationship, hold down the home button to access Siri, then explain the contact relationship.

After adding a relationship, Siri can respond to more personal requests, like calling your husband or sending messages to your mother. You can also set a manual contact relationship label. When you see contact, click "Edit", then scroll down and select "Add connected name". / In / iPhonebasics / Navigation-Safari / Content / Mackoke Silence when adding a name and numbers of someone worse than usual because you meet a new person and is part of their first imprint. So don't be marked as clumsy or slow before having the opportunity to speak with a new contact: your phone is enough and give this advice with confidence. Often to find the "Add contact" button, simply click on the contact icon in the initial screen or in the application box and select "Create contact window. Image of Dallas Thomas/Gadget Hacker if you use Android and add many contacts, You can take the step more by pressing the contextual "Add contact" window for a long time, then lighting it and placing it on the home screen, so the functionality is always available. We have tested it and we discovered that it works with Apple, Samsung, Google phones, Google, OnePlus and LG, but tell us about yoursIn the part of the comments below!
