Gift Card Country Restrictions Hi.I want to buy a gift card for a friend who lives overseas however I am in Singapore.I read that there are country restrictions on Gift Cards but cannot find a list of the included countries. Am I able to buy a gift card for someone who lives outside of South East Asia?Thank you. This topic has been locked Scratched off steam card code [HELP PLEASE] So I just bought a steam gift card and when I was scratching the number off I accidentally removed a number from the code by doing it too hard. I've been searching up how to solve this problem but I can't find anything. Can anyone help please? Hey guys, I wanted to know if Steam gift cards are region locked since I was planning to buy a gift card, but noticed it said "US only", since I'm not from the US (and neither is my home currency the dollar) will I still be able to use that gift card? Just wanted to know in advance so I'm not disappointed later. Thanks in advance. Note: This is ONLY to be used to report spam, advertising, and problematic (harassment, fighting, or rude) posts. This topic has been locked Do Caps and Dashes Need To Be Used For Steam Wallet Codes? I can't seem to be able to activate my steam gift card code and I was wondering if I need to include caps or dashes in the code. Δ Scam Alert: Fake \$50 Steam Gift Card Offer A phishing scam is circulating on Discord, with users receiving DMs containing a link that claims to offer a \$50 Steam gift card. The message appears as a legitimate Steam link but directs to a fake website designed to steal your information. Please do not click on the link or share it with others. Report any suspicious activity to Steam Support immediately. Stay safe and always verify the authenticity of links before clicking! This topic has been locked How to use steam gift cards / wallet codes I went to the website to check and all they told me was:Pick up the gift card which has the dollar amount you would like to purchase.Take to the check out. Once paid for, it will be activated and loaded with the value printed on the front of the card.When you get home scratch the gray security bar on the back of the card to reveal the 15-digit code.Log into your Steam account (or make one if you don't have one) and go to "Redeem a Steam Wallet Code" In the resulting screen enter your code into the "Steam Wallet Code" field.Click Continue.Now you will have the amount of denomination of the gift card added to your Steam Wallet which is viewable in the upper right corner of Steam.problem is, how to go to "Redeem a Steam Wallet Code" thingy? pls help Note: This is ONLY to be used to report spam, advertising, and problematic (harassment, fighting, or rude) posts. Fake "Gift 50\$" steam link links to real steamcommunity.com Hi all,A friend got a message from another friend about "Gift 50\$" with next to it, the "real" steamcommunity.com link, then a bunch of numbers. I know - we know - and I hope everyone knows it's a scam. But this one has me perplexed. What's the point of this one if it leads to the real steam, and since it's a "bad" url, redirects to the frontpage of Steam?I've been trying to find anything, hoping to see a "smart" IDN homograph attack or something, but nothing. Trying to google it up got me no answer aswell.Thanks for your time :)edit: just for clarification, when I talk about the link, it's literally just "steamcommunity.com/" and then a bunch of numbers. no "/gift/" or "/profile/" or anything like that. Why bother hacking into a Discord account just to post a real steamcommunity link? Sure it give reasons for that actions... And the short version is because a good bunch of people exploit their system. Exchanging gifts ... people in turk., india, argentina and so on bought them cheap and sold them for a higher price but below the price that it would cost the buyer in his own country. Win for the seller, win for the buyer, loose for steam because of the lower selling price. CSGO Keys got abused as payment way to avoid the market cut that steam take for using their servers and so on. Win for the people, loose for the company that pay for the servers and earn then at the deal nothing. Besides that both ways got abused with stolen credit cards/payment fraud that harmed in the end the buyer, steam and the game companies. That is only a short list of stuff because I am sleepy and it show enough that you are able to see why they change stuff. Not to like the changes is ok but in the end hate the abusers/exploiters that force a company to such steps. It's not (only) greed. They pay taxes, pay people that work for them and can't say "today we need 1k servers lesser as yesterday" or close offices and such stuff. They must pay for such stuff... so calculate it in at your "they make millions daily..." sentence. The people that sell their steam games/keys they gathered in some way (not at the steam market) don't pay taxes and can stop from one second to the next without a problem because they don't need to pay for servers, offices, other people and so on. PS.: Games are luxus. Not each one need hundred or thousands of them. Buy what you can and want is the solution.
