We provide a large number of clinics across all both our hospital sites. This section of our website outlines what to expect when you visit the outpatients department. Please check your appointment letter/card to find the department or clinic you are attending. When you arrive at the hospital if you are not sure where to go, please ask at the information desk. These can be found at the main entrances to Withington and Wythenshawe Hospitals, and at the Outpatients entrance at Wythenshawe Hospital. Our main outpatients department can be accessed from Entrance 5. You may be directed to another area of the hospital for your appointment. Please refer to your appointment letter. Withington Community Hospital The outpatients department is on the ground floor of the hospital a few minutes walk along the main corridor. When you get to the right department, report to the receptionist or check in using the self-check in service located in some areas. The receptionist/self-check in device will check your personal details against the hospital records. It is important that you tell the receptionist if any of your personal details have changed since you last provided them at the hospital or to your GP. You may be asked to go to another area for any tests the doctor has arranged before you see him/her. You will be asked to take a seat in the waiting area. When it is your turn you will be called into a consulting room. You will be asked again for your name/address/date of birth prior to any test or consultation. This is important as staff need to ensure that the right patient is undergoing the right test or consultation. If at any time you do not understand something you have been told, please ask a member of staff who will explain. If the doctor prescribes medicines at your appointment, you will be able to collect these from the hospital pharmacy. Normal prescription charges apply. If you are exempt from paying prescriptions charges you will need to bring proof of exemption with you to your appointment. The Trust has recently reviewed the way in which it currently books follow-up appointments. Patients who require a follow-up appointment within six weeks of their out-patient consultation will receive their appointment from the Clinic Receptionist before leaving the hospital. For patients who require an appointment in excess of six weeks, e.g. six months, one year etc., the Trust will write to the patient approximately six weeks before their due date and invite them to contact the Outpatient Contact Centre to make an appointment at a convenient date and time. We hope by introducing this system that the number of appointments we have to cancel will reduce; and also the number of patients who fail to attend will also reduce because appointments are not made too far in advance. If you have any queries, please do not hesitate to contact our Contact Centre on 0161 291 5120. For more information, please visit the HTCS website. Written by a NHS patient If no doubt Wythenshawe is the best hospital for heart patient, my father was brought as a in patient from fairfield and was the correct decision they made after 4 weeks of staying in there once bought to Wythenshawe Dr mcloghlan was v nice to dad and also Andy his c ordinator . F2 ward it self was also good but F6 was awful , the cleaning in the whole hospital was horrendous! The nurses are under staffed to be able to even look after my father and support with his anxiousness and way he felt when was I pain as they kept telling nurses to do other stuff. One minutes was told my dads white cells are high and coming down slowly and he won't be discharged in 14th Febuary 2025, then few hours later my dad's paper work and medication and said he is able to go home??? Didn't make sence and when spoke to the junior doctor Dr Asma on f6 she was at helpful and wouldn't give me my dad's consultant name who decided he going home. She made me feel so down and wasn't empathic at all. The first thing that needs to be taught to these junior doctors is being g empathic and support. I just hope he is going to be ok with this infection at home. Page 2 Written by a NHS patient Ive never written a review before but feel I have to in this case. I was admitted to Wythenshawe Hospital late on a Friday with acute breathing problems which turned out to pneumonia. Having seen too many BBC reports on the dire state of the NHS, I went with heavy heart and super low expectations. How wrong I was. How useless is the BBC?! The hospital was very clean, the food pretty good and the staff, from the porters to the junior nurses right through to the doctors at the top, were absolutely exceptional. I have to give a special mention to Tara Luke, a trainee nurse, who has the best bedside manner Ive ever encountered. She is a future NHS superstar for sure. She made my stay a genuine pleasure rather than the ordeal I was programmed by the BBC to expect. The only improvement that could be simply made would be to be offer patients 2 antibiotic pills rather one GIANT pill which then needs breaking into smaller bitsthis is because the more ill a patient becomes the more difficult it is to swallow. Everyone knows this, its not exactly rocket science but it should be so easy to fix! Patients are too ill to break pills into bits and nurses are too busy. Please make super large pills into 2 smaller pills that are therefore twice as easy to swallow compared to one giant pill which is IMPOSSIBLE to swallow whole. Despite this problem Wythenshawe Hospital is the best NHS hospital in Cheshire and probably one of the best in the country. Long story short: Wythenshawe hospital rocks and the staff are absolutely brilliant. Dont ever change. Youre so close to perfect. Thank you so much for your care. And Tara, I think I love you.Xxx Page 3 Written by a NHS patient Attended Wythenshawe Hospital on 25/04/22 for a gastroscopy procedure. The whole experience was pleasant. Staff especially Jason, Carla, Lucy were lovely and put me at ease. Being a first time i was a little nervous as to what to expect but staff are very reassuring and the procedure was quick and painless. I was back home 2 hours later having chose sedation, enjoying a cup of coffee. Big thanks to all staff who cared for me some of whom i didn't catch names. THANKYOU x Page 4 Written by a patient The care I received before my daughter was born was brilliant, however, during my labour I felt abandoned by the staff there. I was left in a room for 5 and a half hours with nobody checking in on me. When somebody eventually came to see me I was 8 and a half cm dilated and taken to the delivery suite. From then on what should of been a beautiful experience for me turned into a nightmare. The midwives that I had were lovely however the other members of staff that occasionally came in and out of the room were extremely rude. Unexpectedly after three hours of pushing around 10 members of staff burst into the room to get me to theatre. I wasnt pre warned that that was going to happen and when I asked what was happening I was shouted at by two members of the team and nobody listened nor answered my questions. The aftercare I received wasn't anything special, I had a dizzy woman that was speaking to her co worker constantly about her partner. The night staff are also very rude and keep you awake by talking loud about their nails and what they did at the weekend. Cleaning staff are very friendly and helpful. Page 5 Written by a patient When the Hospital is open again after the current crisis it is a haven of hope, a place of dedication & treatment to the finest of standards controlled by experienced & compassionate Drs & Nurses who not only help, listen, advise to the benefit of its Patients.The Hospital is well laid out, clearly signed only criticism is lack of specific car parking for different hospital sections. Page 6 Written by a patient I have been many times for consultations, routine checks and procedures to the Wythenshawe Hospital. All the doctors, specialist nurses and radiology staff have been extremely helpful, caring, and attentive. They have been trying to go to the root of my problem and have done everything possible to heal me. I am especially grateful to Ms Karen Irwyn, specialist Neuro-Gastro Nurse, who has been doing everything possible to help me get cured of my condition, and to Dr Toli Onon, Gynaecologist, who is a great expert. I feel that all the staff at the hospital do everything possible to treat patients in the best way. Page 7 Written by a patient The booking in on arrival for outpatients was good. But there seems to be confusion in the waiting bays, ie which area to sit in to wait to be seen. I was told by 3 or 4 different care assistants to wait in 3 different areas - this could be improved, and was not very clear. Waiting times were reasonable. Parking was good. The parking system is excellent, where you take a ticket on arrival and pay before you leave - love it. Also I did not have any trouble finding a space, though my appointments were quite early in the day. Pleased so far.....not had my surgery yet though.... Page 8 Written by a patient Sort the parking and get a designer with hospitality experience to give the place a once over for a better patient doctor experience.Care taken for granted, a level of uplifting, fun, happiness and wellbeing thats easily maintained by the staff, to be introduced. Yes I am such a designer Page 9 Written by a patient My review is for the gastroscopy service. Although they were obviously very busy, all patients were kept informed on waiting times and reasons for delays, which meant we felt valued. Comfy chairs in waiting room conducive to amenable chats. Medical team of 4 were 100% professional and friendly and made an inevitably slightly uncomfortable procedure much more bearable. Cannot rate them higher; at all times I was treated as an important individual and was kept fully informed on everything that was happening. Thank you for such wonderful care. Page 10 Review of Accident and Emergency I popped in to get my foot checked after a work accident. They didnt keep me waiting too long. Staff was smiled and helpful. Automobile Association Developments Ltd. 2019 If, on the other hand, you intend to go to Wythenshawe Hospital by bus or train, specifying the place of departure, as already suggested, you will be shown the options to choose from, updated based on availability, in order to use public transport. Trains and/or buses to get to Wythenshawe Hospital. In this way you will be able to check the public transport available to Wythenshawe Hospital with directions, step by step, from the station or bus stop closest to your destination. So that he can be helped in moving in the city.On where is Wythenshawe Hospital (England) is available information on Wythenshawe Hospital (England), such as the distance from neighboring towns and major cities (measured in kilometers and miles).It is also possible, thanks to google maps, to memorize the position of numerous activities such as: attractions, museums, restaurants, supermarkets, post offices, banks, ATMs, railway stations, airports, service stations (gas stations), auto and car mechanics, renting cars, hospitals, pharmacies, doctors, dentists, veterinarians, schools, bookshops, churches, cemeteries.
